Education

2020 – 2025
BACHELOR OF COMPUTER SCIENCE
BirZeit University

Skills

- Flutter
- Native app development with android
- Data Science
- JAVA-OOP
- Data Structure
- Analysis Algorithm
- Python
- MySQL
- Web development (HTML,CSS,PHP)
- C
- Problem-Solving
- Team working and communication
- Work under stress

Language

- Arbic (Native)
- English (very Good)

ABOUT ME

- Recent Computer Science graduate from Birzeit University with a strong foundation in software development and programming principles.
- Highly motivated and passionate about coding, with a solid understanding of computer science theory and practical problem-solving.
- Eager to apply academic knowledge in real-world projects and grow as a professional software developer in a dynamic work environment.

Graduation Project

Title: Financial Management System
Tools: Flutter, Firebase, Dart, Gray Wolf Optimization (GWO) Algorithm

- Developed a mobile financial management application that helps users organize their income, expenses, and savings.
- The app provides real-time tracking, detailed analytics, and smart budgeting features with personalized financial recommendations using the Gray Wolf Optimization (GWO) algorithm.
- Key features include expense tracking, budget creation, goal setting, financial reporting (PDF/Excel), and notification alerts.
- The system was built using Flutter for cross-platform UI and Firebase for real-time backend, ensuring high scalability, secure authentication, and fast data access.
- The project aimed to improve financial awareness and decision-making by offering users insights into their spending habits and suggesting budget optimization strategies.
